the production of regulator installations (Regleranlagen) has diminished. At present, special attention is being given to the production of measuring instruments for altimeters, depth gauges and control equipment for airplanes and sea-going vessels. Ninety percent of the entire production is allegedly being exported to Communist China. This plant has 1,800 employees and work is done in three shifts. *

25X1 ✱

Comment. The 1952 production program of the VEB Askania Plant at 1-2 Oderstrasse in Berlin-Teltow included the construction of regulating installations, testing, measuring, oscillator, oceanographic and nautical equipment.
